

CUSTOM FOUR POST LIFT FOR THEATER STAGE SETS AND SCENERY

SPECIALTY SOLUTION #9

ENTERTAINMENT

- 22,000 lb capacity, mechanical actuation, platform measures 178" x 480", 252" vertical travel
- Extremely safe four-post vertical screw design
- Quiet operation during theater production
- Durable, reliable, robust design
- Lifts rolling sets and props weighing 10 tons from the production floor to the main theater stage

Handling Specialty custom engineered, manufactured and installed a large four-post Cargovator backstage at the largest Christian themed live theater in the US.

Handling Specialty's project management team coordinated the building's team of architects, engineers and installers during the construction process. The project was successful and resulted in the theater organization ordering an additional lift for an adjacent theater.
